- 5 Alpalhão, M. S. (2004) Do *dit* e do *lai*: o conto medieval. *Forma Breve Nº1 – Revista de Literatura. O Conto - Teoria e Análise*, 39-46.

TRABALHO 6 – PARTE II

- Citações e referências bibliográficas segundo as normas APA, com recurso à ferramenta informática Mendeley.

Objectivo:

5 Referências:

1 monografia com um autor

1 monografia com mais de um autor

2 artigos de revista científica

1 capítulo de livro

1- One related aspect to be taken into account is that pregnancy is regarded as a biological and physiologically normal condition in any woman, in distinct cultures. However, societies determine the suitable moments to live this condition and attempt (or should try) to prepare their members for this experience. In contemporary urban-industrial societies, there is some distancing between the biologically fertile-looking appearance, mental and social skills. The latter appear at a later stage and have not received proper attention from society.” (Martha Lucio Alvarez, 2008)

2 - “The objective of the study was to determine the prevalence of excessive alcohol consumption and examine the associations existing between this consumption and sociodemographic characteristics, social support, health conditions and use of health services.” (Prais et al., 2008)

3 - “The chronic administration of alcohol in rats, with subsequent AWS, causes an increase in the formation of free radicals in several brain regions, as well as an increase in the nitric oxide molecule through the metabolism of ethanol.” (Maciel & Kerr-Corrêa, 2004)

4 - “While it is possible to determine how recently the social drinker has been drinking, and to exclude those who may have been drinking in the last 24-48 hours, one cannot expect abstinence for three weeks or longer—a time span that may be necessary to observe reversibility in heavy social drinkers. ” (SHIRLEY Y. HILL, PHD,1983)

5 - "Acupuncture has been used as a treatment for addiction to substances other than alcohol but the results are not encouraging." (Raistrick, Heather, & Godfrey, 2005)
